

PARTNERING FOR PATIENTS CONFERENCE A HUGE SUCCESS

The event provided managers of physician offices, skilled care facilities and hospitals the tools needed to share results with a focus on medication safety across the transitions in care, security for hardware and software, and the necessities for optimizing office function. The presentation by Joseph Suchocki of Eagle Associates was so popular that Bloomington Hospital will be bringing him in for a one-day seminar on June 9, 2009. You may [register online](#) for this event.

HEALTHLINC LAUNCHES A NEW WEBSITE

We are pleased to announce the launch of the New and Improved HealthLINC website. The site has been completely redesigned to better showcase the important work being accomplished by HealthLINC and its partners. Keep on top of current happenings with an RSS subscription to our headlines.

SAVE THE DATE

Clinical Messaging Users Webinar

**Thursday, April 2, 2009
12N-12:45p**

Mark your calendar for this event that you will not want to miss.

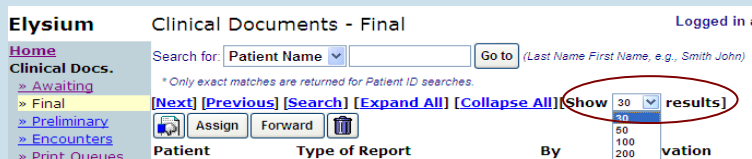

1. Click [Here](#) to Join the Webinar
2. Join the conference call:
353.3599 or 888.231.3599
Code 1120#

TIP OF THE TRADE

Setup your SSO for quick access to your Clinical Documents

INCREASE THE NUMBER OF RESULTS SHOWN IN FINAL VIEW

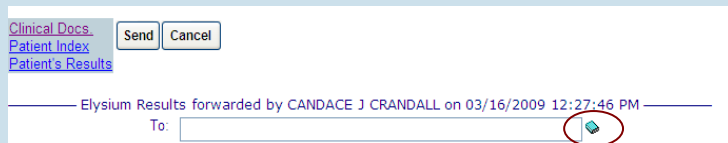

We have a **NEW** feature available in "Final" view. You may now increase the number of results that are shown per page from 30 to 500. Increasing this default enables you to scroll through results quickly, without the need to click {Next}.

FORWARDING RESULTS....

HOW IT WORKS AND WHAT IS YOUR RESPONSIBILITY

When **Forwarding** a patient result to another user outside of your Clinical Messaging box, it is important to make sure you use the icon located to the right of the "To" box. The first time you forward to another user, you might want to call to make sure your result made it. Some users may be listed in the directory, but are currently not actively using their box.

HELP SPREAD THE WORD

Please remember to share your Clinical Messaging experience with your colleagues. Let them know how it has improved your office workflow and how it could improve theirs, along with the ability to better communicate and make referrals.

WEBINARS TO ENHANCE YOUR CM USE

As requested at our 2009 Partnering for Patients Conference, we will begin hosting Webinars to cover the topics that you have asked to learn more about. We believe sharing information among this group will allow for the discovery of new and exciting functions and allow you to share the workflow issues you have been able to address with the use of this product. As you know, the sharing of information is an excellent tool. You never know, you might just teach us something!

Mark your calendar for the following dates 12N-12:45p.m.

- April 2
- June 4
- August 6
- October 1
- December 3

JOIN OUR LINKEDIN HEALTHLINC USERS GROUP

Sharing is the way to grow our community HIE (Health Information Exchange). We have started a network of Clinical Messaging users on **LinkedIn**, a business-oriented social networking site used for professional networking. Participate in discussions and share your knowledge and help your network. You will also find answers to your Frequently Asked Questions on this site. Please consider joining the **LinkedIn** users group by registering at www.linkedin.com and searching for the **HealthLINC users group**.
